PROFESSIONAL SUMMARY

Azure Data Engineer with 1.5+ years of experience designing and operating production data platforms on Microsoft Fabric, Azure Data Factory, Azure Synapse Analytics, and OneLake. Skilled in building medallion Lakehouse architectures, incremental ingestion pipelines, PySpark and Spark SQL transformations, star-schema Power BI semantic models, and Azure DevOps CI/CD with Azure Key Vault and Managed Identity. Microsoft Certified Fabric Data Engineer and Analytics Engineer Associate, delivering analytics-ready datasets serving 1000+ users with measurable gains in data quality, latency, and reliability.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Institute of Technology Nirma University, Ahmedabad

2021-2025

CGPA: 8.05

EXPERIENCE

Software Engineer 1

MAQ Software

July 2025 - Present

Noida, India

- Architected end-to-end Bronze/Silver/Gold medallion architecture on Microsoft Fabric OneLake (Delta/Parquet) with reusable PySpark transformations, schema enforcement, and data quality checks, improving downstream query latency by ~35%.
- Built incremental ingestion pipelines using Azure Data Factory and Fabric Pipelines, orchestrating PySpark and Spark SQL notebooks for joins, cleaning, and enrichment across multi-source datasets.
- Designed star-schema Power BI semantic models with fact and conformed dimension tables, optimized DAX measures, and RLS over Lakehouse data, improving report responsiveness by ~25% for 1000+ business users.
- Implemented CI/CD with Azure DevOps YAML pipelines and Fabric Deployment Pipelines across Dev/UAT/Prod, integrating Azure Key Vault-backed secrets and Managed Identity authentication for governed, secure releases.
- Optimized PySpark and Spark SQL workloads through partitioning, broadcast joins, and V-Order on Delta tables, reducing job runtime by ~20–30% on large datasets.
- Developed Fabric Data Agents over 10+ curated datasets and built a Question-DAX golden-dataset evaluation framework, raising answer accuracy from ~60% to ~85% through iterative error analysis.

Associate Software Engineer

MAQ Software

December 2024 - June 2025

Noida, India

- Delivered end-to-end ETL/ELT workflows in Microsoft Fabric using Dataflows Gen2, Lakehouse tables, and tabular models across 5+ business entities, improving data quality and consistency by ~15–20%.
- Engineered PySpark and Python notebooks processing ~10K records/day for translation, sentiment analysis, PII redaction, and classification, producing analytics-ready curated tables on OneLake (Delta format).
- Authored Spark SQL transformations for staging, joining, cleaning, and enrichment across curated layers, enforcing referential integrity and row-level validation rules.
- Automated scheduled pipelines with monitoring, retry logic, and email alerting, reducing manual intervention by ~90% and cutting failure detection time by ~50–60%.
- Implemented role-based access (RLS) and workspace-level governance in Power BI and Fabric, ensuring secure, audited access to sensitive datasets.
- Collaborated on Git-based development workflows in Azure DevOps using branching, pull requests, and code reviews for pipeline, notebook, and semantic model artifacts.

TECHNICAL SKILLS

Languages: Python, SQL, PySpark

Azure Platforms: Microsoft Fabric, Azure Data Factory, Azure Synapse Analytics, Azure SQL, Azure Key Vault, Azure DevOps

Frameworks & Libraries: Apache Spark, Delta Lake, Pandas, NumPy

Tools: Power BI, Tabular Editor, Git, VS Code

ACHIEVEMENTS & CERTIFICATIONS

- Microsoft Certified: Fabric Data Engineer Associate
- Microsoft Certified: Fabric Analytics Engineer Associate
- Qualified for semi-final round in Amazon HackOn Round 3 with All India Rank - Top 50 out of 28000+ teams.
- Specialist - Codeforces (Max Rating: 1581) (Profile Link).
- 4 Star Rated Programmer - CodeChef (Profile Link).
- Secured Global Rank 67 in CodeChef Starters Round 152 (Div 2).
- Solved 1000+ problems across platforms like Codeforces, CodeChef, LeetCode, CSES, and HackerRank.
